How to Remove the Image Stamp in a PowerPoint Presentation

Step 1: Select the desired image(s) and create the PowerPoint presentation. If you need help, refer to the “How to create PowerPoint Presentations” document.

Step 2: **Click on the image**, and **press “Picture Format”** at the top right of the page. Then, **select the crop function**.

You can also click the Right Mouse button on the image, and a toolbar will appear. Then, **select “Crop”**.

Step 3: Once the crop function has been enabled, simply move the mouse to the black rectangle located at the top center of the image above the image stamp. When the mouse cursor shape changes, click and hold the left mouse button down and pull the top edge of the image down covering the image stamp. Let go of the mouse button when finished and click off the image.

Repeat the above steps for each image.
